March 2017

The Pavement to Parks program is pleased to announce that it has merged with Groundplay.

Groundplay now serves as the catalyst and communication hub for all temporary public-space projects in San Francisco that are citizen-powered and city-sanctioned.

Best practices found in this document are still applicable to Groundplay projects.

For more information, visit groundplaysf.org.
The interdepartmental Pavement to Parks team has developed a pre-approved set of basic components for creating public spaces. These include ground surface treatments, planters, and furnishings which the City will provide once a Plaza Proposal is accepted by Pavement to Parks. This catalog will continue to expand in the future to include other elements and choices for temporary physical treatments in the Right-of-Way. Check the website regularly for new updates.
PERIMETER STRIPING*

The perimeter of the pedestrianized area will be bounded by an 8" white stripe.

GROUND SURFACE COLOR*

Colored pavement inside the edgelines of the Pedestrian Plaza is not considered a traffic control device and therefore is covered under the CAMUTCD for Colored Pavement included in Section 3G.01: "Colored pavements consist of differently colored road paving materials, such as colored asphalt or concrete, or paint or other marking materials applied to the surface of a road or island to simulate a colored pavement."

The ground surface inside the edgelines of the Pedestrian Plaza will be treated with StreetBond 150 in Khaki. StreetsBond is the identified manufacturer:

http://www.quest-cp.com/streetbond150
http://www.quest-cp.com/color/sb-colorant-khaki

* Per coordination with the specifications for Painted Safety Zones

Product

Color
Khaki (SRI=37)
Section 6F.63 of the CAMUTCD provides standards for Channelizing Devices. Pedestrian Plazas in San Francisco are supported by the following: “Channelizing devices provide for smooth and gradual vehicular traffic flow from one lane to another, onto a bypass or detour, or into a narrower traveled way. They are also used to channelize vehicular traffic away from the work space, pavement drop-offs, pedestrian or shared-use paths, or opposing directions of vehicular traffic.”

Soft Hit Posts should be arrayed along the perimeter of the Pedestrian Plaza on the same alignment (on top of) the 8” wide perimeter stripe. Spacing of Soft-Hit Posts should be no less than 5’ but no more than 8’.

**OTHER TRAFFIC SIGNS**

Each site will be analyzed on a case-by-case basis to determine if additional CAMUTCD signage is required for motorists in the vicinity of the Pedestrian Plaza. These could include Yield (R1-2), No Turn (R3-1, R3-2), Turn Only (R3-5), Must Turn (R3-8), Do Not Enter (R3-27 and R5-1), No Motor Vehicles (R5-3), etc.

* Per coordination with the SFMTA specifications for Painted Safety Zones
SOFT-HIT POSTS

UPCYCLED GRANITE BLOCKS AND CURBS

PLANT CONTAINERS*

Planters may either be square, rectangular, or cone shaped; per project design. The planters may vary in height and width per project design. Old Town Fiberglass is the identified manufacturer: [http://www.oldtownfiberglass.com/products/standard-planters/](http://www.oldtownfiberglass.com/products/standard-planters/)

All planters should be Light Gray #16 in the anti-graffiti finishes: Gloss or Matte.

PLANT PALETTE

The San Francisco Plant Finder is a resource for gardeners, designers, ecologists and anyone who is interested in greening neighborhoods, enhancing our urban ecology and surviving the drought. The Plant Finder recommends appropriate habitat-building plants for sidewalks, backyards and roofs that are adapted to San Francisco’s unique environment and climate.

* Per coordination with the SFMTA specifications for Painted Safety Zones.

SF PLANT FINDER WEB SITE:
SFPLANTFINDER.ORG

About the SF Plant Finder

The Plant Finder recommends appropriate habitat-building plants for sidewalks, backyards and roofs that are adapted to San Francisco’s unique environment and climate. This tool was developed as part of the Green Connections project and provides a centralized location to learn about plants and trees recommended by City agencies and local ecology experts. The tool includes links to the Green Connections Ecology Guides – route-specific recommendations to support target species and habitat along the 24 Green Connection routes.

To use SF Plant Finder, visit the web site:

www.sfplantfinder.org
A plant database for creating habitat in San Francisco.
MOVABLE FURNISHINGS

Finish color for movable furnishings may vary per site or per project sponsor. The City may wish to specify a limited range of colors, or even a single color, to convey a consistent image of Pedestrian Plazas throughout the City.

All furnishings are collapsible to facilitate convenient deployment and off-time storage. EMU America is the identified manufacturer: http://emuamericas.com/
